

85 Series Heavy Duty Currency Counter

When the Machine is Tough, the Choice Isn't

The Cassida 85 is built one way: tough. Manufactured from durable steel components, it is designed from the ground up for years of high throughput operation in commercial applications.

Worn bills? No problem

The Cassida 85 has been designed to handle both crisp, new bills and bills that are nearing the end of their lives, accurately processing all bills, regardless of condition.

Superior protection against counterfeits

The Cassida 85 has been engineered to tackle counterfeit bills head on. By incorporating dual head MG (magnetic) and dual sensor UV (ultraviolet) detection systems, we've ensured the ultimate protection against counterfeit bills.

Counting, adding, and batching

The Cassida 85 includes all the counting modes you would expect to find on a heavy-duty currency counter, including counts up to 9,999 bills, program batch amounts as low as 1 or as high as 999, and an add + batch mode that allows batching while totaling all counts.

Enhanced user experience

The high capacity 1,000 bill hopper and 3-way selectable speed will ensure an uninterrupted, convenient count, even with the highest volume counts. A built-in handle makes the sturdy and durable Cassida 85 easy to move around the office or to take to remote locations.

A healthier way to count money

With the operator's health in mind, we've developed a dust collector (optional) that helps reduce health risks associated with the airborne micro-particles abundant on bills. Placed under the unit, this unique feature requires no special care and does not interfere with any machine operations.

Optional dust collector traps harmful particles

Optional remote display

Product Specs

Model range:	Cassida 85 Cassida 85 U Cassida 85UM
Dimensions, unit:	10.8" W x 9.2" D x 10" H (275mm x 233mm x 254mm)
Weight:	11.7 lb (5.3 kg)
Power input:	100-240 VAC 50-60Hz
Power consumption:	40 W
Warranty:	1-year parts and labor warranty
Options	- remote display - dust collector

Counting Specs

Counting speed:	900 - 1200 -1500 bill/minute
Hopper capacity:	1000 bills (new bills)
Stacker capacity	300 bills (new bills)

Operating Modes

Count:	simple count; auto-stop
Batch:	programmable to 999
Add:	0 - 9,999; adds up all counts
Add+Batch	adds up all counts while batching
Error detection	half, double, chain, note-width
Counterfeit detection	UV (U and UM models) MG (UM model)
